**Leadership Development Comments (Optional)**

More than any assignment previously, CO is an assignment where an officer must rely upon and/or develop the greatest range of competencies. Beginning with taking care of oneself, then managing and leading others, a CO must ensure performance of the ship and crew to meet the mission in the midst of many challenges and conflicts. A CO is also introduced to competencies of Leading Organizations, particularly personnel and financial issues of the ship and fleet, and part ne ring with programs.

**D. Additional Operational Development (security clearances, special training) or Operational Development Comments (Optional)**

This billet provides the incumbent with the unique opportunity to command one of the Nation's public vessels. It is the highest seagoing billet attainable, and the opportunity for an officer to showcase what they have learned throughout their career at sea. A CO is responsible for training their Wardroom on the path to serve as future COs.
SECTION 12 - PROGRAM, PROJECT, OR ACTIVITY DEVELOPMENT

List specific qualifications, knowledge, skills or abilities to be developed in this billet. For example: budget (MARS, CBS); personnel; contracting (COTR, Warrants); Scientific (IHO Category A, scientific papers/publications, GIS); engineering (marine survey, ABYC, ABS, FAA); regulatory (US Code, CFR); information technology (databases, networks, programming).

A CO will develop an increased depth and expansion of capability in the following administrative areas:
- Personnel plans and evaluations (WM and officers), awards, discipline, hiring, etc.
- Procurement mechanisms and requirements (purchase card, purchase order, etc.)
- Budget tracking and reporting

Through supervision of the Engineering department, monitoring of the Casualty Reports and Ship Repair Requests, and full participation in the Work Definition Conferences, COs coordinate with multiple stakeholders (ship's crew, MOC, program) to address technical issues, resolve problems, and set priorities for moving forward to meet the ship's mission - particularly with resources.

Of note, a CO is expected to become more aware of fleet issues existing beyond his/her ship and to make contributions towards addressing these issues. In particular, a CO is expected to monitor and review the FOMS and report any deficiencies to the MOC and Fleet Standardization office.

Officers will gain more familiarity with the mission of NOAA Fisheries, particularly in the NE region.

SECTION 13 - CRITICAL SUCCESS CRITERIA

Provide brief measurable performance goals which would represent successful performance in this billet.

- Safe operation of the ship as indicated by the annual fleet inspection and accident report submissions
- Completion of the mission as indicated by cruise evaluations and other feedback from the program as well as quantity and quality of scientific data gathered by the ship
- Performance of CO duties indicates potential for assuming greater leadership responsibilities
- Recommendation by CO, MOC for the officer to serve as a future CO, MOC, or in other senior level positions throughout NOAA
